For Octavia.

# Editor's note

*Since You Were Born* is a book composed of the chronological history of every website visited on the artist's computer over a three month period beginning with the birth of his daughter Octavia (July 19, 2013). It thus belongs to the genre that once someone with a sheer fantasy and a bad taste for names called "autobotography": it shows a portion of the artist's life as it is preserved by bots – in this case, the "Chronology" function of the browser.

The book is dedicated to Octavia, and we have to take this dedication seriously. It's not just a re-enactment of authors' habit to dedicate whatever they put on paper to their loved ones; and it's not a mere consequence of the fact that the book tells us about her, too. Reading it made me sure that Octavia is the intended reader of the book; the book is for her - and if she were the only reader, this would be a sufficient condition for the book to exist. While Roth's prints and installations using the information stored in his own or other people's cache are meant for public display, this book is a more private outcome. What you are about to read is a personal, intimate communication from a father to a daughter; a private collection of memories, something in between the diary and the family album. Maybe one day the Roth family will go through it, sitting on the sofa, commenting on a link and the memories triggered by them. "Look, this is when you didn't poo for two days – we were so worried!" Like pictures in a family album, it will trigger memories that weren't intended to be pictured and saved, and that the image or the link will make re-appear vividly in mind – like that *Breaking Bad* episode downloaded and watched the night that the baby couldn't sleep.

And yet, this is not a diary. The whole book can be seen as a found, unintended picture of the artist and his life beyond the screen. It was taken by Mozilla Firefox, namely to allow him to rapidly go back to his browsing history if needed - and, more covertly, to store information about the human beyond that IP address. It explores a form of portraiture commonly addressed as “profiling”. On a very basic level, it makes it visible to us. Like all Roth’s work based on the cache, it has a biopolitical relevance for the very fact to make the invisible visible. It shows us that, when we are sitting in front of our screen, we are in fact inhabiting a corporate controlled space where every single thing we do goes noticed – or, at least, noted. Maybe we already know this, maybe not – but in both cases – it makes it visible through the effectiveness of a familiar artifact – a book, an image.

At another level, the book questions the effectiveness of profiling as a form of portraiture. How much does the big G actually know about us? How much of this detailed record of an individual’s browsing activity is relevant to portray him / her? How much is negligible, uninteresting or even deceptive?

Finally, *Since You Were Born* offers a picture of the web, taken at an instant that is meaningful in the personal life of one of its users, but completely random in the life of the medium, and from a very specific point of view (a single user’s computer) that is rarely shared. While I’m writing, Facebook lets me know that today the web has turned 25. Although the internet is a bit older, it’s still in its infancy in terms of a successful medium usual lifespan. Twenty-five years after the invention of print, people were still making books in the way they used to make them in the Middle Ages: precious, hyper-decorated, and with elegant, Gothic typefaces. We call these books “incunabula”. It took about fifty years for people to fully understand the democratic potential of print; and it took centuries to make this potential really effective. The web we experienced in

1994 is, twenty years later, archeology; and so it will be the web as we are experiencing it now, in twenty years.

In twenty years, Octavia will be 21, and probably an active web user, if we will still be using such words as “web” and “user”. And from this book (yes, books will still be around and won’t look like archeological remains) she will learn something about herself, her family and the place where her parents were spending most of their time in 2014. And so will your children as well.

– Domenico Quaranta

Hey, Burners! A reminder! | monochrom

Arena / screenbeans screenshots

PRISM works because a ton of data moves through U.S. servers. That's also why it could fail.

NSA snooping could cost U.S. tech companies \$35 billion over three years

**LINK Editions** is a publishing initiative of the **LINK Center for the Arts of the Information Age**. LINK Editions uses the print on demand approach to create an accessible, dynamic series of essays and pamphlets, but also tutorials, study notes and conference proceedings connected to its educational activities. A keen advocate of the idea that information wants to be free, LINK Editions releases its contents free of charge in .pdf format, and on paper at a price accessible to all. Link Editions is a not-for-profit initiative and all its contents are circulated under an Attribution-NonCommercial-ShareAlike 3.0 Unported (CC BY-NC-SA 3.0) license.
