

# Solitaire.exe

Solitaire.exe is a physical recreation of the popular desktop computer game 'Solitaire' included in the default installation of the Windows 3.0 operating system from 1990. This limited edition deck of cards was created by artist Evan Roth for the Smithsonian Cooper-Hewitt, National Design Museum.

The original Microsoft Solitaire card faces were designed by Susan Kare and the beach scene card back was designed by Leslie Kooy. The original developer of the game itself (called Sol.exe) is Wes Cherry.
